DETAILED ACTION

Amendment

1. Receipt is acknowledged of the Amendment filed June 23, 2005.

Allowable Subject Matter

3. Claims 1-24 are allowable over prior art.

The following is an examiner's reason for allowance: Prior art teaches optical gain correction filters, which may comprise a multilayer film structure. The above identified prior art of record, taken alone, or in combination with any other prior art, fails to teach or fairly suggest the specific features of claims 1-24, which are disclosed in the current application. Specifically, prior art does not teach the optical gain correction filter, made up of a multilayer film structure, which is formed by stacking a plurality of thin films with different refractive indices on a light transmitting board as disclosed in claim 1 of the current invention. The claimed filter has a transmissivity T_1 when light with a wavelength λ enters at an incident angle. Furthermore the thickness of each thin film is set to increase the transmissivity T_1 when the incident angle increases close to a predetermined maximum incident angle with respect to the incident light with a wavelength λ_0 entering the multilayer film structure. In another aspect, in regards to claim 5, prior art fails to teach the thickness of each thin film being set to increase the transmissivity T_1 when the wavelength λ increases close to a predetermined maximum wavelength λ_{\max} with respect to the incident light entering the multiplayer structure at an incident angle. Similarly, in regards to claim 9, prior art fails to teach the thickness of each thin film is set to increase the reflectivity R_1 when the incident angle increases

close to a predetermined maximum incident angle with respect to the incident light with a wavelength λ_0 entering the multilayer film structure. In regards to claim 13, prior art fails to teach the thickness of each thin film being set to increase the reflectivity R_1 when the wavelength λ increases close to a predetermined maximum wavelength λ_{\max} with respect to the incident light entering the multiplayer structure at an incident angle. These specific limitations are not disclosed in prior art and moreover, one of ordinary skill in the art would not have been motivated to come to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
